Short presentation

I am working on the internal relationships between the Indo-European language branches, but I am also engaged in many other phonological and morphological aspects of Indo-European linguistics:

comparative Indo-European linguistics

reconstruction of the Indo-European proto-language

linguistic phylogenetics

the relationship between Indo-Iranian and Greek

Greek linguistic history

Indo-Iranian linguistic history

I am further interested in language history of other language families, language variation in general, epigraphy and runology.
